

Streamlit To-Do Application

This is a simple to-do application built using Streamlit, where users can add, remove, mark tasks as completed, and sort tasks by priority.

Features

Add Task: Users can add a new task along with its priority level.

Remove Task: Users can remove a task from the list.

Mark Task as Completed: Users can mark a task as completed.

Sort Tasks by Priority: Users can sort the tasks based on their priority levels.

Usage

1-Add Task:

Enter the task name in the provided text input field.

Adjust the priority level using the slider.

Click the "Add Task" button to add the task.

2-Mark Task as Completed:

Select the task from the dropdown list of pending tasks.

Click the "Complete Task" button to mark the selected task as completed.

3-Remove Task:

Select the task from the dropdown list of tasks.

Click the "Remove Task" button to remove the selected task.

4-Sort Tasks by Priority:

Click the "Sort Tasks by Priority" button to sort the tasks based on their priority levels.
